Magnetic Lighting System

One shop, One light...

There are many lighting types in retail lighting design, such as general lighting, accent lighting, and task lighting, is it possible to use one light fixture to solve all the lighting requirements?

Yes, it is MAGNETIC MINITRACK SYSTEM.

The light designer could use it in various possibilities.

Attractive Colour Presentation...

CRI>90, High Quality Light Output

Because ambient light rproduces colours differently,
the colour rendering index (CRI) is used as reference.
The CRI indicates the ratio by which the illuminated object
or the illuminated area deviates from the maximum
value of 100 (daylight).
MINI TRACK has an impressively high CRI of 90, which
means that it comes very close to natural light and is
suitable for colour-sensitive applications such as
display cases and special exhibition spaces.
The material quality, feel, and colour authenticity of
merchandise and artworks need to be rendered
as accurately as possible to accentuate object's value.
The especially small light surface of the LEDs and
high light density allow the luminaires to perfectly
reflect the three-dimensionality of amorphous surfaces.
Products with a CRI of 90 are perfect for high-end sales
floors and art settings.

R9>90, Closer to True Colors

R9 is the index to present the color of Red.
Red is a very important icon to many objects
like photography, textiles, bones and skins.
For human eyes, the red is a key reference to
distinguish the real true colors.
A higher R9 index can better present the true colors.
MINI TRACK, with R9 higher than 90, can better present
the world closer to true colors.

CASAMBI READY wireless control for DALI luminaires

The Zambelis 48V tracks ara compatible with CASAMBI control system, which permits bidirectional communication between control device and luminaires, making it possible for the user to create scenes, regulate the system from smart devices, etc.

With the CASAMBI control system and its Control wireless variants, the user has total control over the installation, with all the features available in low voltage alternatives. The 48V system does not mean relinquishing the leading edge in control for architectural lighting.

48mm LED profile luminaire, made of an extruded alumunium, power-coated with fine sandy finish. Designed for ceiling/pendant/trim-less/recessed, providing direct light emission through a diffuser made either of satined polycarbonate for an aLmost homegeneous emission of light. Luminaire equipped with the latest generation of well known **LED** boards with small color tolerance.

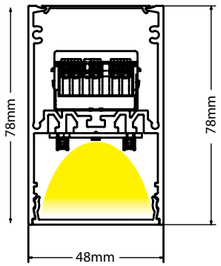

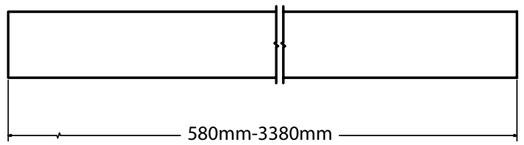

34mm LED profile luminaire, made of an extruded alumunium, power-coated with fine sandy finish. Designed for ceiling/pendant/trim-less/recessed mounting, providing direct light emission through PMMA diffuser. Luminaire equipped with the latest generation of well known **LED** boards with small color tolerance.
